

CULT TRANSLATOR

AI-Powered Translation for Adobe After Effects

Installation & Quick Start Guide

★ Overview

Cult Translator is an advanced AI translation and localization tool for motion designers, editors, and video creators working inside **Adobe After Effects**.

With support for **100+ languages**, batch translation, recursive precomp detection, and context prompts, Cult Translator lets you translate entire compositions in seconds — directly inside After Effects.

📦 Installation (Manual Setup)

1. Open **Adobe After Effects**.
2. Go to **File** → **Scripts** → **Install ScriptUI Panel...**
3. Select **CultTranslator.jsx**.
4. Restart After Effects.
5. Open the panel via **Window** → **Cult Translator**.
6. In **Preferences** → **Scripting & Expressions**, enable:

“Allow Scripts to Write Files and Access Network”.

💡 *Once installed, the panel will appear in your AE workspace.*

🔑 Activation

Your downloaded ZIP already contains a **personalized CultTranslator.jsx** with your unique license key embedded.

- Each license is valid for **one computer**.
 - To move it to another machine, contact:
cult.translator@cultextensions.com
 - Manage your subscription:
 <https://ae-translate-proxy.onrender.com/manage>
 - Retrieve your installer:
 <https://ae-translate-proxy.onrender.com/claim>
-

Quick Start

1. Open a composition containing **text layers**.
2. Choose your **Source** and **Target** languages.
3. (Optional) Add **context** to clarify meaning.
4. Click **Translate**.

The plugin automatically translates:

-  Selected text layers
-  Text inside nested precomps
-  Large layer sets via efficient batching

 *All translations are written directly into your composition — no third-party apps required.*
